True to its commitment to foster integrity of creation and quality education, Saint Louis University continuously collaborates with non-government organizations to tackle SDGs through research programs.

OUR DEVELOPMENT PARADIGM

Safe Food

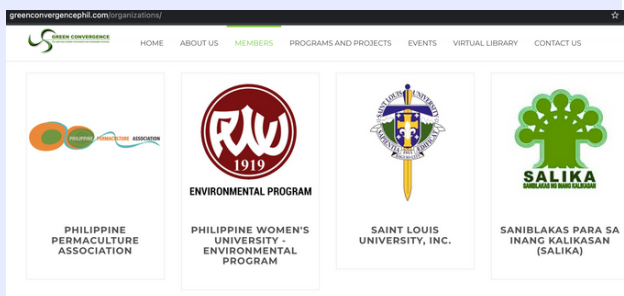

Access to safe, sufficient and nutritious food is a right that Filipinos must possess. A big challenge to this right is the current agricultural system that extensively uses chemical inputs as fertilizers and pesticides. This has not only reduced unsafe food but the long ears of chemical use have also led to decreasing soil fertility and compromising the country's water ecosystems.

Healthy Environment

A healthy environment sustains the integrity of the land, air, and water. Originally blessed with rich soil and ecosystems containing abundant and diverse natural resources, the Philippines has become a poor, devastated land.

Sustainable Economy

A sustainable or green economy promotes sustainable consumption and production that supports continued economic growth, which creates opportunities for employment and decent work for all. Such a paradigm contributes to eradicating poverty and improving human welfare, while maintaining the healthy functioning of the Earth's ecosystems.

RESEARCH PLAN

1. Research title

Promoting Teacher Education for Climate Change Education through Collaboration between Asian Centres of Excellence on Education for Sustainable Development

2. Organizer

Okayama University ESD Promotion Sustainable Development

3. Sponsor

Fund for the Promotion of Joint Internat (JSPS)

4. Cooperation with

UNESCO Bangkok

5. Duration

November 2020 – March 2024

11. Roles of each researcher
