SCHOOL OF NURSING, ALLIED HEALTH, AND BIOLOGICAL SCIENCES

VISION & MISSION

- The School of Nursing, Allied Health and Biological Sciences envisions herself as the seat of excellence in Nursing, Allied Health and Biological Sciences Education that is dynamic and inspired by a Christian way of living, producing globally competitive and value-laden nurses and health-care professionals in service of humanity.

SONAHBS HISTORY

- A reunification of two schools: the School of Natural Sciences (SNS), which was once the College of Natural Science and split off from the College of Liberal Arts in 1968; and the School of Nursing, which split off from the College of Natural Sciences in 1976.

SCHOOL OF NURSING, ALLIED HEALTH, AND BIOLOGICAL SCIENCES

GOALS AND OBJECTIVES

- SPECIFIC GOAL OF NURSING PROGRAMS

- 1.To prepare its graduates for the practice of nursing in various settings by providing a broad basic education necessary for the proper understanding of principles and methods of modern scientific nursing; by giving enough opportunities for participation in various programs in the health care system; and by actual practice in real situations – be it in the hospital, in the family, or in community health where the student will serve;
- 2.To provide the broadest possible background of cultural and professional knowledge and equip the student with skills needed for future leadership positions in nursing
- 3.To develop the personal qualities that would enable the student to live a wholesome, satisfying life as a Christian, as a professional, and as an individual, and to contribute maximally to the welfare and development of the country and humanity.

- The specific objectives of the Allied Health and Biological Sciences Program are the following:

- 1.To provide an educational program to uphold human values in a learning environment characterized by a spirit of unity, a climate of trust, openness, and mutual respect;
- 2.To develop professionals by providing a learning experience through well-planned curricula in the analysis of the building units of life from the molecular level to higher levels of the organization, thus serving as a foundation for research and further studies;
- 3.To conduct basic and applied research that is significant, locally and globally;
- 4.To assume responsibility over important health and environmental issues within the capacity of the school to perform; and,
- 5.To find creative ways and means to operate as a self-reliant unit and sustain long-term growth and development.

SCHOOL OF NURSING, ALLIED HEALTH, AND BIOLOGICAL SCIENCES

PROGRAM OFFERING

- Bachelor of Science in Biology | BS Biol
- Bachelor of Science in Medical Laboratory Science | BSMLS
- Bachelor of Science in Nursing | BSN
- Bachelor of Science in Pharmacy | BS Pharm
- Bachelor of Science in Radiologic Technology | BSRT
