The Saint Louis University Wastewater Treatment System in both the Main and Mary Heights campuses is upgraded to the latest and most innovative technology available in the industry today. The Wastewater Treatment System in the university campuses removes contaminants from sewage to produce an effluent suitable for discharge to the surrounding environment or an intended reuse application, thereby preventing water pollution from raw sewage discharges.

Saint Louis University commissioned and joined a partnership with KBWorld Trading Corp. and Hyper Kem and Machineries, Inc. in the attainment of the Wastewater Treatment System upgrade.

Bishop Carlito Cenzone, D.D. Sports Center

This facility was built on the lot where the former SLU Covered Courts were located. SLU's Bishop Carlito Cenzone, D.D Sports Center includes two indoor multifunctional courts and rock-climbing facilities that are used for fitness courses and employee-student recreational activities. The newly built SLU Parking building is also in this facility.

St. Alloysius Gonzaga Parish of SLU
