## Saint Louis University

## Sexual and reproductive health care services for students

Saint Louis University's continuous advocacy to educate students and learners about sexual and reproductive health care enables Louisians to seeking positive behaviors that reduces the chances of risky sexual behaviors. Moreover, SLU recognizes the crucial need for breastfeeding stations. The University commitment in supporting mothers to have secure attachment with infants is both beneficial for the physical and mental health and development of both child and mother.

## **SLU Breast Feeding Station**

Published in: SLU Website

at URL: <a href="https://www.slu.edu.ph/health-services/">https://www.slu.edu.ph/health-services/</a>

The SLU Breast Feeding Station was established in response to the requirements of faculty, staff, and student moms to help mothers meet their children's nutritional needs. A pumping station and refrigeration are provided as services to guarantee the freshness of children's milk.

## Maternal & Child Nursing and Community Health Nursing

Maternal and child nursing (MCN) and Community health nursing (CHN) are vital subjects in nursing education that equip students with the knowledge and skills essential for addressing the multifaceted realm of sexual and reproductive health. MCN highlights the concept that empowers students to make informed decisions, practice safe sex, foster healthy relationships, and understand diverse sexual identities while reducing unintended pregnancies, STIs, and promoting mental well-being and emotional safety. Moreover, community health nursing highlights the different programs offered by the government along with preventive healthcare, with a strong focus on family planning, vaccinations, and health education. Nursing students are trained to engage and educate families in the care process, acknowledging that family dynamics often play a critical role in sexual and reproductive health decisions. All in all, MCN and CHN courses arm students with the knowledge, skills, and attitudes related to reproductive health care that they can use not only for themselves but also for the client/s they serve.
