Empowering Youth Stewardship:

SLU's Youth Council of Ecolodians Partners with CURMA for Marine Conservation

By empowering student leadership, building multi-sectoral partnerships, and supporting hands-on marine conservation initiatives, higher education institutions play a vital role in fostering long-term environmental responsibility across coastal and upland communities alike.

Saint Louis University (SLU) operationalizes this commitment by supporting student-led environmental organizations like the Youth Council of Ecolodians (YCE). Recognizing that land-based and highland communities directly impact coastal ecosystems, SLU supports youth initiatives that bridge regional gaps to protect marine life and coastal habitats.

By actively supporting the Youth Council of Ecolodians in building cross-regional partnerships with CURMA, Saint Louis University demonstrates how institutional support for student programs drives practical, measurable, and community-rooted aquatic stewardship
