SLU promotes sustainable commuting through shuttle services

Saint Louis University continues to support students enrolled in Fit-Aquatics courses through a dedicated shuttle service, operated in partnership with the School Services Operators and Drivers' Association. The service provides safe, reliable, and affordable transport between the SLU main campus and the Mary Heights Campus Fit-Aquatics facility, in both directions. Written guidelines have been issued to all concerned parties to ensure the service is run consistently and responsibly.

This ongoing initiative advances the United Nations Sustainable Development Goals, particularly SDG 11: Sustainable Cities and Communities. By providing a shared, safe, and low-cost transport option, the university contributes to Target 11.2, which calls for access to safe, affordable, and sustainable transport systems for all. In doing so, it reflects SLU's sustained commitment to student welfare and to more environmentally responsible ways of getting around.
